Progress

Triumph Aircraft

---

Foreman Kyle Kennedy and his crew completed a job in Wellington, KS earlier this month. By completion, the crew had installed a 600 amp electric heater used for heating airplane parts.

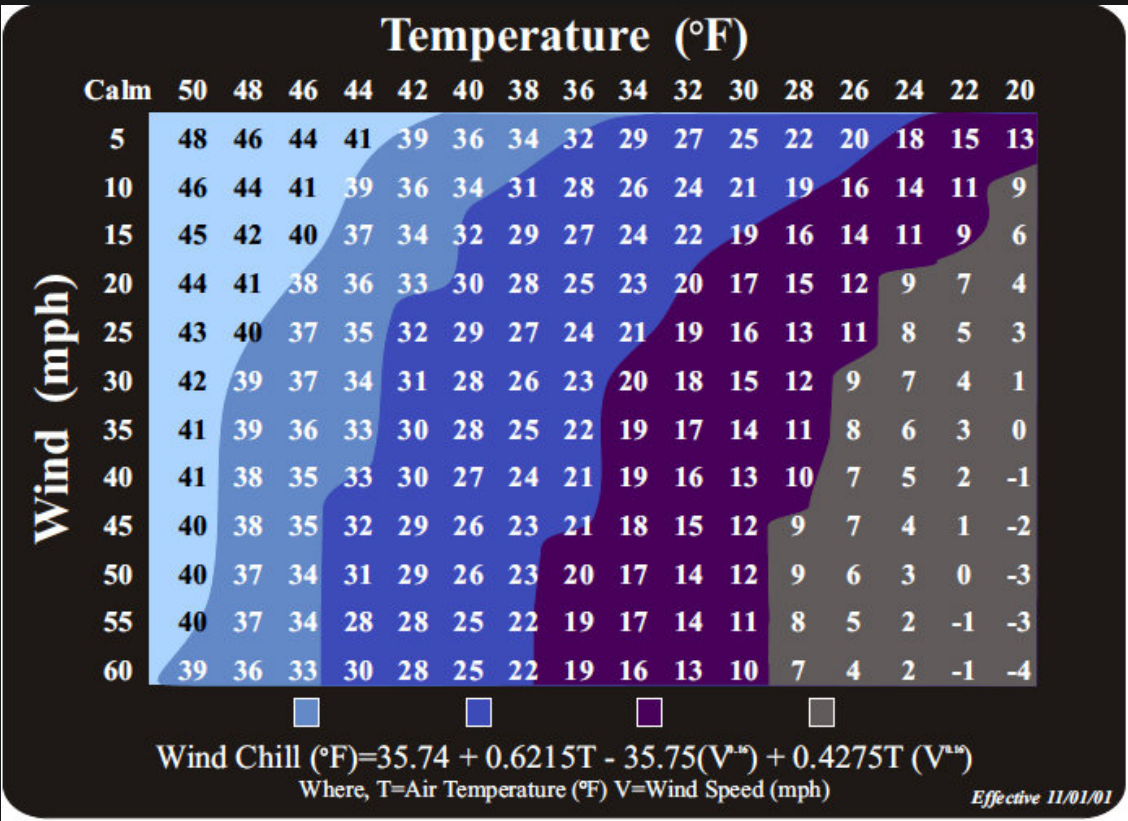

Safety

# Cold Stress

January will bring colder temperatures to worksites. With these colder temps comes an increased risk of cold stress for outdoor workers. While not as common or talked about as heat stress, those affected could result in tissue damage or even death. Factors such as cold air temperatures, high velocity air movement, dampness of the air and contact with cold water or surfaces contribute to the likelihood of cold stress. OSHA offers the following clothing recommendations to help keep out the cold:

- Wear at least three layers of clothing. An inner layer of wool, silk or synthetic to wick moisture away from the body. A middle layer of wool or synthetic to provide insulation even when wet. An outer wind and rain protection layer that allows some ventilation to prevent overheating. Layering provides better insulation. Do not wear tight-fitting clothing.
- Wear a hat or hood to help keep your whole body warmer. Hats reduce the amount of body heat that escapes from your head.
- Wear insulated boots or other footwear.
- Keep extra clothing (including underwear) handy in case you get wet and need to change.
- Do not underestimate the wetting effects of perspiration. Often, wicking and venting of the body's sweat and heat are more important than protecting from rain or snow.

Use the National Weather Service chart below as a guide for temperatures and windchill to keep you and your crew safe during the winter!

# Decker Holiday Party

We are celebrating the hard work and dedication of each Decker Electric employee who made this year a success at a holiday party on Saturday, January 7th. Please be on the look out for an email from Tyler Helget regarding specific details of the event.

---

## Progress

### Fort Scott Detention Center

Foreman Brent Combs and his crew will complete the slab rough next week to prepare for the concrete slab. The project should be completed in September of 2017.
