July 2019 Issue

Project Progress

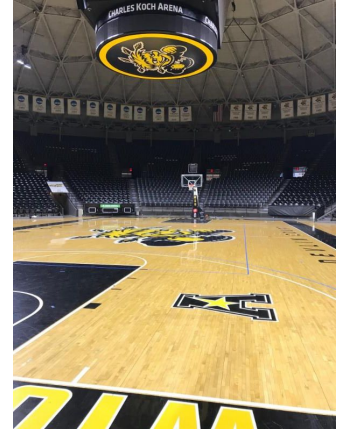

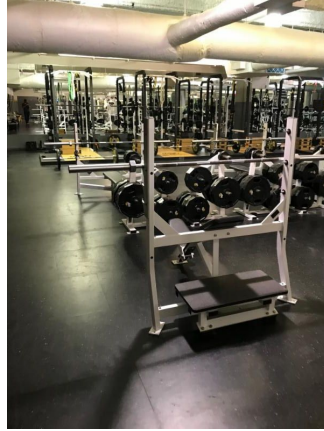

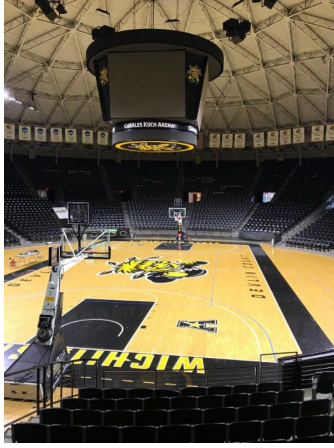

Camping World

Decker Electric provided a variety of electrical services for two retail/service buildings for Gander Outdoor & Camping World in Wichita. Clint Allmon was the Project Foreman and the project included branch power, lighting, fire alarm systems, low voltage system rough-in, site lighting and power. The entire project was completed in 10 months.

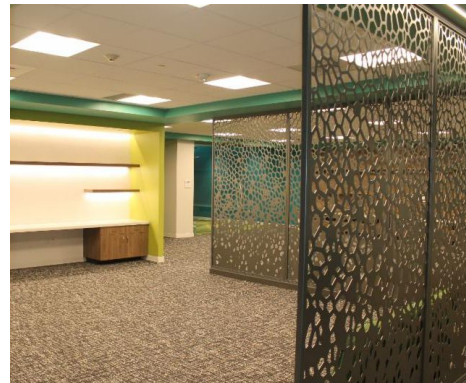

Wichita State University DAS

Chris Brewer, Nick England are the Foremen on the WSU DAS Project. After 15 months of patiently waiting, we finally started the Distributed Antenna System project for Pierson Wireless at Koch Arena on Wichita State University's campus. This project teams our Seaton Construction, electricians and telecommunication groups all together on one project. This is a fast-tracked project that at completion, and agreements fulfilled with carriers, will improve your cell phone coverage at the next Shockers game you go to. Chris is working on routing conduit to feed the new DAS project at WSU Koch Arena. He is about 25% complete in the project that is to be completed September 1st. Thank you WSU and Pierson Wireless for allowing our Team to be a part of this exciting project.

Ronald McDonald House

Decker Electric was excited to receive Substantial Completion at the Health Strategies and Ronald McDonald Projects with Key Construction earlier this month. A big congratulations to Foreman Ryan Atchison and his team for such a successful project. Thank you RMDH, Key Construction, PEC, HFG and CBRE for allowing us to be a part of this great Team and Project!

Steve & Lisa Decker with Susan Smythe, the CEO/Executive Director Ronald McDonald House Charities Wichita. This photo was taken at the ribbon cutting event.

Decker Electric performed the electrical scope on this new facility and Lisa serves as a volunteer for RMHC.

Cunningham Well Lot Control Upgrade Phase II

Decker Electric started the underground installation at 47 well sites with James Eck leading the crew. All underground conduit is rob roy and all excavation is by hydrovac. Expected completion is December 2019.

ICM Element

Kyle Kennedy is leading the crew with Boiler and Turbine ready for start-up this week and next.

Brandon Seiwert is leading the installation of heat trace throughout the plant.

Decker Electric is scheduled for our scope completion during the month of August / September.

Proterra Bus Charging Stations

Ryan Atchison (Foreman) is leading the crew on the City of Wichita Proterra Bus Charging Station Project. Decker Electric is about 40% complete on the project and is currently working on setting equipment, routing conduit and pulling wire. The Substantial Completion date is scheduled for August 16th.

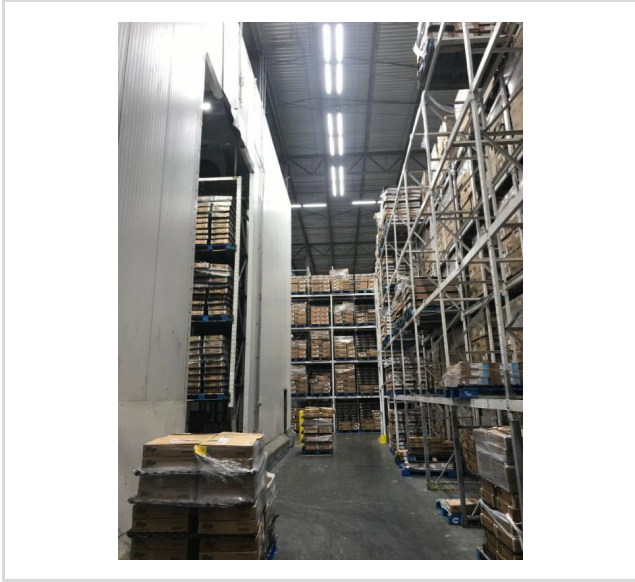

South Lakes Ball Fields and Linwood Park Ball Fields

Jason Deberry is leading his crew repairing ball field lights at two separate City of Wichita locations including South Lakes Ball Field and Linwood Park Ball Field. The City of Wichita project is scheduled to be completed this week.

Tyson Holcomb Freezer Lights

Javier Ramos and Sergio Moncada worked in some frigid temperatures last week at our Tyson

Holcomb facility to install light fixtures in the blast freezer. They spent about 7 hours in conditions that were hovering around -9 Deg F. This was in contrast to the 98 degree weather outside. They did a great job of working with the plant to rewire and mount these fixtures.

2019 Family Day

At Decker Electric, we work hard AND we play hard. Here are the photos to prove it! It's our Summer party to celebrate our team for all the hard work they do all year round along with our family and friends. A big thank you to EVERYONE in the Decker Family who came and enjoyed good food & summer fun at our Summer Family Day event.

Milestone Anniversaries

Nebraska Flood Support

Decker Electric contributed money to support Nebraska Flood Victims and we received a very nice Thank You letter and some pictures.

Thank you!

Thanks so much for the kindness shown to the Nebraska Flood Victims.

From Steve Jones and the Lincoln Labor Union

Review Highlight

2019-07-16 ★★★★★

“Showed great detail and care for my customers. Great Communication and concern for all involved, thank you!”

Mark Claar

2019-07-24 ★★★★★

“Great company great people excellent high quality work”

Brandon McLey
