

December 2017 Issue

Decker Electric

Progress

Aqua 305

John Perkins, Jonathan Holdaway, Dave Wiley and others have been building a server for Aqua 305 in Wichita. Installing new panel feeders, branch circuits and wiring panels for the server racks to ensure the customer is up and running. Coordination between the City of Wichita, Westar and vendors has been essential to the success of the project.

Praise

Service Department

Decker's Service Department is on call 24/7 and is always going above and beyond to help our customers. One of those customers recently left this review;

"Had to call for emergency service today which not only was Sunday but also New Year's Eve....Johnathon was here super fast and located the problem quickly!!! FANTASTIC service all the way around!!!! Great job!!!! Very pleased and will definitely recommend this company to others!!!"

Thank you to all of those who work in the Service Department!

Progress

TransCanada

Decker provided power and controls to two DRA skids at the Cromwell location of TransCanada. Today is the outage there. We are doing this to six stations.

Staff

Notable Work Anniversary

A big thank you and congratulations to Brent Combs and Scott Nelson who are both celebrating **5 years** at Decker Electric this month.

Staff

Decker Holiday Party

Reminder! Decker's holiday party is January 6th from 7PM to 9:30PM at the Distillery 244 in Old Town. You should have already RSVP'd, but you if have any questions, contact Tyler Helget thelget@decker-electric.com.

Progress

KAAPA Ethanol

The new DDG building in Ravenna, NE is almost complete thanks, in part, to the leadership of Christian Ray and Greg Evans.
