Volunteer Opportunity

The Lord's Diner

The Wired to Help team is excited to offer this volunteer opportunity to all Decker Electric employees and their families (children 12 and older can volunteer with an adult).

We will help host the evening meal on Tuesday, November 13th. Volunteers need to be at the Lord's Diner at 5:15 PM and should be done no later than 7:45 PM. We will have a Wired to Help shirt for you to wear.

The Lord's Diner needs around 35 volunteers each night and we would love to have a good turn out of Decker volunteers. We need to know as soon as possible if you would like to help; please sign up at Lisa's desk. We will be turning in a number on November 6th.

Thank you in advance to all volunteers!

Community Events

Interfaith Ministries

On Saturday, October 27th, Decker donated a new 200 amp service and panel to Interfaith Ministries. Seven Decker electricians donated their time to install the service and panel to Interfaith's Spiritual Center overflow shelter building at 841 N Market in Wichita. With this, Interfaith will now be able to open the overflow shelter to Wichita's homeless community over the winter. Thank you to Tyler Helmet, Brian Fair, Clint Allmon, Chris Martin, Mike Purdue, James Helten and Gary Lindow for taking time out of your weekend to help such a great cause!

Community Events

Seize the Day 5K

Thank you to everyone who participated in the Seize the Day 5K on Team Emery!
We had a great turn out and can't wait for next year!

KAAPA Scales

Crews have finished installing and relocating scales and compuweigh equipment at the KAAPA Ethanol plant in Ravenna, NE. Foreman, Christian Ray did a great job as lead and Marty Mapes was instrumental in the design and technical support.

Progress

Camping World/ Gander Outdoor

Clint Allmon and team are installing slab rough conduit on both the Camping World and Gander Outdoor sites.

Progress Foley Specialty Shop

Tate Nowlin did a great job cleaning up the wiring at the specialty shop at Foley.

Tate Nowlin and Eric Phelps successfully installed the Gallagher Access Control System.

Progress

Tesla Charging Stations

Foreman, James Eck, Sterling Kemp and Dave Wiley are preparing to pull wire to Tesla charging stations.

Progress

Daktronics-Norwich High School

The Daktronics Video Board Installation is complete thanks to Nick England and

Our team successfully provided a new and complete network infrastructure at a chemical plant in Fredonia, KS. Challenged with keeping the site up and running during install, our team installed 8 new equipment racks in various locations spread throughout the chemical plant. Thank you Richard Claycamp, Chase Ishman and Armoni Coppins.
