**Project Progress**

**East Kansas  
Agri-Energy Project**

We are completing the final installs of this design build project for East Kansas Agri-Energy. It included power, lighting, grounding, heat trace, controls & instrumentation.  
We are on time, on budget & accident free.

## BNSF Project

Bryan Wallace and Trent Potter Working on the generator and new utility feed at the BNSF Rail yard in Temple Tx.

## City of Wichita - ATS Project

Kyle Kennedy is leading the installation of 1000A ATS for the City of Wichita. This is to replace the old and dysfunctional existing ATS.

## Kansas Sheriff's Association's Conference

Tate Nowlin assembling Decker Electric's Gallagher display for the Kansas Sheriff's Association's Conference. Each year this event brings in Sheriff's departments from all over Kansas for lectures and product demonstrations. This is Decker Electric's second year attending the conference.

## Tyson Holcomb Update

After nearly 4 months of working 7 days a week, and 12 hours a day, Decker Electric is proud to say that we have helped to get the Tyson plant in Holcomb Kansas back up and running. On August 9<sup>th</sup>, Tyson had a devastating fire in the Hydraulic room that spread through the box shop and into several of the electrical panel rooms that feed the harvest floor. Tyson had structural damage to a large portion of the roof, and several walls. They had lost the entirety of 2 huge panel rooms that supplied power to the harvest floor and Tyson lost a bunch of equipment that they use to butcher nearly 6000 head of cattle every day. Decker Electric had our general foreman Javier Ramos on site within 24 hours of the fire being put out to start coordinating with project managers Ben Wilson and Brian Fair on a plan to get materials and labor on site to start the rebuilding of the plant. Decker manned up to a total of 43 electricians on site at one point in the project, and worked for nearly 4 months solid to be able to meet the aggressive deadline that Tyson had set to get the plant back up and running. Javier

and his crews not only met the deadline set, but were actually completed ahead of schedule with our assigned portion, and was able to lend a hand to other contractors that were needing assistance finishing up their tasks. Currently Decker electric has a crew of about 15 electricians on site finishing up with fans on the kill floor, lighting, convenience outlets, and other small items that need to be finished. Special thanks to General foreman Javier Ramos, and his 4 foremen, Miles Cleary, Paul Riggle, Greg Evans, and Jason Sneed for their great leadership through this very important job.

## Employee News

# MARTIN MAPES

THANK YOU AND CONGRATULATIONS ON  
20 YEARS  
AT DECKER ELECTRIC

## Walktober Results

Congratulations to everyone that participated in Decker's very first wellness challenge. As a whole, **6 MILLION** steps is a huge accomplishment and a great start to becoming more aware of increasing our day to day physical activities. We encourage you to keep your step trackers in use. Thank you to everyone who participated and thank you Decker Electric for supporting its employees!

### MONTH TOTALS
