Project Progress

Frenchman Valley COOP

Crews working at the Frenchman Valley COOP site in Culbertson Nebraska are making some serious progress on the grain bin additions on the South side of the facility. Miles Cleary and his crew have been installing conduit coming out of the electric room and headed out several directions to power equipment on a new 156' steel bin that is being installed by Habco. This structure has 18 top fans, 8 bottom fans, an internal bin sweep system, and several conveyors. Provisions are also being made for a future bin that will sit adjacent to the one being installed. Work is scheduled to wrap up in October and just in time for fall harvest.

Occidental Chemical

Chris Martin and his team continue to do great work at the Occidental Chemical Corporation here in Wichita. The crew is replacing the existing power distribution center and running new robroy and cable tray from the electrical room to MCC's and control panels around the plant. Chris and the team are preparing for the shutdown starting on September 14th. Decker is working directly with Occidental Chemical for this project with the help from Piping & Equipment on the bulkheads and steel supports.

Cogeneration Plant for KS Ethanol

Seaton Construction Group has made significant progress during the months of July and August to the Cogeneration Plant for KS Ethanol located in Lyons, KS. The building

structure, pipe support rack and electrical building piers are complete and now ready for MEP systems to be installed. Most of the piping has been installed in the pipe rack and in the plant's existing energy center ahead of schedule to tie in during this fall's outage. Decker Electric, Full Circle, Prairie Landworks and Central Consolidated Fire will start installing supports and mechanical equipment within the building soon!

WIRED TO HELP

A Community Service Branch of **DECKER ELECTRIC**

On September 30th from 10AM to 3:00PM Decker Electric and Seaton Construction will be hosting our biannual Blood Drive with American Red Cross. In addition to our blood donation, American Red Cross will be providing testing for COVID-19 antibodies. Every day, the American Red Cross helps patients battling disease, illness, and injury. Together, we can help to ensure patients have access to blood.
