September 2020 Issue

Project Progress

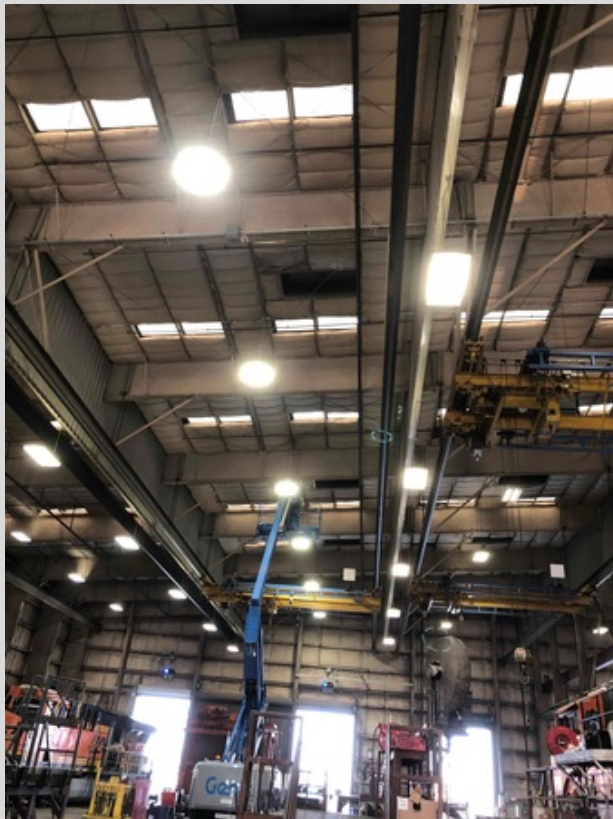

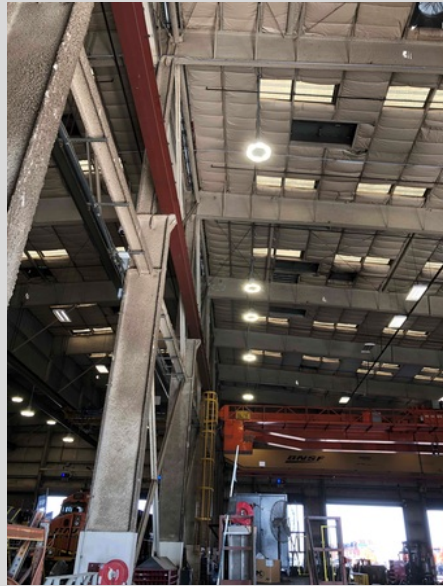

All Creatures Veterinary Hospital

Seaton Construction Group has been busy putting the final touches on our 4,500 square foot remodel project at All Creatures Veterinary Hospital. The end of the project required a great deal of coordination with subcontractors and the Owner, as there were many owner furnished items that came over from their existing building. This includes equipment such as exam lift tables, surgery lights, dental lift tables, and many other veterinarian specific equipment items. We would like to say a special thank you to All Creatures Veterinary Hospital, Occidental Management, and all of our subcontractors for persevering through the complications caused by COVID-19.

BNSF Barstow

John Ramey, Brandon Seiwert, and Ian Gaudin have been working at the BNSF facility in Barstow California to install high bay lighting and egress lighting in two separate buildings. This work started in late July and has a completion date of October 24th. This job will be completed a month early due to good planning by the guys on site. The last portion of this job will be to replace the services in both of the buildings that we have been working in. We will be installing a 600 amp service in the Car shop building, and we will be installing a 1200 amp service in the locomotive maintenance building. Each of these service swaps will be completed over the next week. Thanks to BNSF for working with us to minimize down time for them, but allow us to get our work done in a busy facility.

Kiewit Project Award

Decker Electric was the Subcontractor of the Month with an impressive 9,800 hours worked. There were no safety incidents or quality issues. A job well done by Kyle

American Red Cross

Give blood. Help save lives.

Over 30 employees and friends of Decker Electric took time out of their day to donate blood at our bi-annual blood drive on September 30th. The American Red Cross brought their mobile donating bus to the front parking lot of Decker Electric and efficiently moved our donors through the whole process of filling out the Rapid Pass, Pre donation testing, and the actual donations. Thanks to all that donated this go around! Also, thanks to the American

Red Cross for doing COVID-19 antibody testing on everyone who donated!
